

Technical Skills

- **Full-stack Technologies:** Node.js, Express, TypeScript, Python, Java (Spring), React, Redux, JavaScript, CSS, HTML
- **Database Technologies:** MySQL, PostgreSQL, MongoDB, SQL
- **DevOps, Infra & Cloud:** Docker, AWS (EC2), Azure (VM, Service Bus), GitHub Actions, Git, Linux, Elasticsearch, Kibana

Education

Master of Science in Software Engineering, 3.87 / 4.0 GPA | 01/2024 - 12/2025 | **Arizona State University** | Mesa, AZ

Coursework: System Design (Distributed & Scalable Microservices), Data Structures and Algorithms, MLOps

Bachelor of Science in Computer Science | 08/2019 | **REVA University** | Bengaluru, KA

Experience

Senior Software Engineer | 04/2023 - 12/2023 | **Tecnotree** | Bengaluru, KA

- **Awarded the “Spotlight” cash award** for leading high-quality feature delivery in React and Node.js.
- Led development of UI screens using reusable React components and Node.js APIs in a production environment.

Senior Software Engineer | 07/2022 - 03/2023 | **PangeaTech** | Bengaluru, KA

Founding engineer at a startup responsible for the backend performance, infrastructure, and deployment of an ML platform.

- Used MLFlow for ML model version management, logging, testing, and experimentation of the ML platform.
- **Reduced data processing time by 80%** (4 hours to 45 minutes) by redesigning the backend to distribute workloads across Kubernetes-orchestrated containers (event driven architecture).
- **Decreased time taken for bug root cause identification from 4 hours to real time** by implementing a centralized logging developer platform using the EFK stack to address the observability gap.
- **Reduced Azure cloud costs by 30%** through optimizing VM utilization by Node.js scaling across CPU cores.
- Enhanced code quality and standards by writing 50+ code reviews and mentoring junior developers.

Software Engineer | 11/2021 - 07/2022 | **PangeaTech** | Bengaluru, KA

- **Engineered a 97% reduction in MySQL database refresh** duration (from 8 hours to 15 minutes) by converting a synchronous Python data pipeline to asynchronous, saving significant client time.
- Improved the availability and reliability of MySQL database servers ensuring 99% availability via server redundancy.
- **Reduced deployment time by 85%** (from 27 to 4 minutes) and deployment failures by containerizing the application with Docker and automating the pipeline via GitHub Actions enabling faster testing and saving dev time.

Software Engineer | 07/2019 - 04/2021 | **Tenerity (a JPMorgan Chase company)** | Pune, MH

- **Increased test coverage to 90%**, ensured compliance with accessibility standards (WCAG) and internationalization.
- Delivered REST APIs and frontend components using test-driven development for a high-traffic flight booking platform serving millions of customers keeping security and maintainability in mind (SonarQube, Jenkins).
- Applied test-driven development, OOPS and SOLID principles to deliver maintainable, production-grade code.

Additional Experience

Team Lead | 8/2025 - 12/25 | **Email Marketing Microservice**, ABC Academy of Music | Remote

- Led a team of 5 developers driving technical decision making, and requirement gathering with the product owner.
- **Boosted team productivity by 75%** by introducing AI agent based (GitHub Copilot) development workflows.
- Built Java Spring Boot REST APIs backed by PostgreSQL; automated CI/CD pipeline via GitHub Actions on AWS EC2, achieving 99% uptime.

Fullstack Engineer | 9/2021 - 10/21 | **Upsell Widget UI**, Friendly Brands | Remote

- **Improved click-through rate of an upsell UI widget by 30%** for an e-commerce live site through data-driven A/B testing of alternative UI features (Python FastAPI, SSR).

Engineering Tutor | 8/2024 - 12/25 | **Arizona State University** | Tempe, AZ

- Delivered 100+ tutoring sessions on Agile & Lean, Data Structures and Algorithms, Python, and Databases.

Projects

Web Simulator: A simulation tool which can be programmed to run simulations of any system (D3.js graphs, echarts).

Cocodrillo: Developed in 48 hours an interactive pro-environment ChatGPT based Avatar to help limit a user's carbon emissions.
